

iusti2017.org
31st IUSTI-Europe Congress on STIs
31 August - 2 September Helsinki 2017

TIMINGS

Please **do keep the time allocated to your presentation**. As we are using Message Wall in Europea Hall it is most important to **leave time for questions and answers**. The session Chair and Moderators will review the questions / comments / polls. Messages and/or voting results will be displayed **after** presentations.

PRESENTATIONS

All presentations **must be uploaded in the session room / computer at least 1 hour before your session commences**. Using your own computer in the lecture theatre is NOT permitted. There will be a computer and technical help available on a desk in front of Nautica Hall of the Marina Congress Center.

Presentations will need to be in a screen ratio of **16:9**

Please note- most versions of PowerPoint are in 4:3 screen ratio as standard, so you will likely need to change this – [please follow this link for simple instructions](#)

Computers used for presentation are Windows machines with PowerPoint 2016. If you use Mac and Keynote, please convert your presentation to Powerpoint or PDF for display. If possible, test it beforehand to make sure it functions the way it is supposed to avoid last minute problems.

If your presentation contains **video files**, make sure they are included with your presentation either as embedded data or as separate files within the same folder. The easiest way to test this is to copy the presentation to a USB memory stick and try to open it on another machine, if possible.

Presentations can be supplied in the following formats:

- USB storage device
- Uploaded via a cloud-based system (wetransfer.com). If your presentation contains multiple files, please use ZIP to compress them into a single file before transfer. (In Windows, put them all into a single folder, right click on that folder and select *Send to -> Compressed folder*) Please send notification your presentation to info@concreator.com no later than **Friday, August 25th**. Presentations supplied after this date will not be transferred to the technicians

After exporting and/or moving the presentation to an USB stick, if possible please test it on another machine to see that the presentation works as it should.

Video playback can be supplied in the following formats:

- Digital computer files (e.g. .mov, .avi .wmv etc)

MESSAGEWALL

There is a Message Wall in the main lecture room of the congress. The Message Wall enables active interaction with the audience and our goal is to make this event as interactive as possible with a help of an active audience.

The audience can participate by using either text messaging or web browser of mobile devices. It's been made very easy and comfortable and it gives voice also to those a bit quieter ones in the audience.

The Message Wall displays moderated questions, comments and/or voting results. There is free WiFi in the congress venue.

All messages are moderated and processed anonymously. Text messages cost a standard sms-rate.
